PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Cloud Computing and Automation with hands-on experience in Machine Learning, Data Analytics, and Warehouse Operations. Experienced in developing predictive models, inventory analytics dashboards, and AI-powered applications using Python, SQL, Streamlit, Flask, and TensorFlow. Passionate about leveraging data-driven solutions to solve real-world business challenges and improve operational efficiency.

EDUCATION

VIT Bhopal University

Bachelor of Technology (B.Tech.) in Computer Science Engineering

July 2022 – July 2026

CGPA: 9.05/10

– Specialization: Cloud Computing and Automation

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL

Machine Learning: Scikit-learn, TensorFlow, PyTorch, OpenCV, SpaCy

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering, Data Cleaning, Exploratory Data Analysis (EDA)

Databases: MySQL, Microsoft SQL Server

Frameworks & Tools: Streamlit, Flask, Git, GitHub, Excel

Cloud: AWS Fundamentals, Microsoft Azure Fundamentals

EXPERIENCE

Machine Learning Intern

Oct 2024 – Dec 2024

Infosys Springboard Program

- Developed **MediScan**, an AI-powered eye disease detection system using EfficientNetB3, achieving **93% classification accuracy** across cataract, diabetic retinopathy, glaucoma, and normal retinal images.
- Implemented advanced image preprocessing techniques including noise reduction, normalization, and augmentation using OpenCV to improve feature extraction and model performance.
- Fine-tuned deep learning architectures including VGG19, ResNet50, and EfficientNet using PyTorch, improving model robustness while reducing training time.
- Designed a scalable AI workflow for telemedicine applications using Python, PyTorch, Flask, Streamlit, Pandas, and OpenCV to support early disease detection.

Operation Analyst Intern

Jan 2026 – Jul 2026

Flipkart

Maharashtra

- Developed interactive inventory analytics dashboards using Python, SQL, Streamlit, and Excel to monitor warehouse space utilization, inventory health, and operational KPIs, enabling data-driven decision making.
- Performed bin-level and pallet-level inventory utilization analysis to identify overutilized and underutilized storage locations, improving warehouse space optimization and inventory planning.
- Automated operational reporting and KPI tracking by building dynamic dashboards with filters, visualizations, and performance metrics, significantly reducing manual reporting effort and improving reporting accuracy.
- Collaborated with warehouse operations teams to analyze large-scale inventory datasets and provide actionable insights for inventory movement, storage optimization, and process improvement.

PROJECTS

Student Performance Analyzer | *Machine Learning Project*

Jan 2025 – May 2025

- Developed a machine learning model to predict students' mathematics performance with an **R² score of 88%** using Linear Regression.
- Performed exploratory data analysis on more than 1,000 student records to identify demographic, academic, and socio-economic factors affecting performance.

- Built an end-to-end machine learning pipeline including preprocessing, feature engineering, model training, hyperparameter tuning using GridSearchCV, and evaluation.
- Developed a responsive Flask web application for real-time prediction using Python, Scikit-learn, Pandas, and Matplotlib.

MyExpense | *Personal Finance Management Application*

Jun 2025 – Aug 2025

- Designed and developed a cross-platform desktop application using PyQt6 for real-time income and expense tracking.
- Implemented predictive expense analytics using machine learning algorithms to analyze spending patterns and provide personalized financial insights.
- Integrated SQL and Pandas for efficient transaction management, reporting, and data analysis.
- Designed an intuitive user interface with interactive dashboards for budgeting, expense categorization, and financial visualization.

ACHIEVEMENTS & HACKATHONS

Ericsson Edge Academia Program | *Top 500*

2024

- Successfully completed industry-oriented training on emerging technologies, software development, cloud computing, and digital transformation through the Ericsson Edge Academia Program.

Zelestra Hackathon | *Rank 80*

2025

- Developed a machine learning model to forecast energy consumption using historical datasets.
- Applied feature engineering and hyperparameter tuning techniques, achieving **89.88% prediction accuracy**.

Shell AI Hackathon | *Top 130*

2025

- Designed and trained a machine learning model for predictive analytics, achieving an overall prediction accuracy of **87.6%**.

Solvit Hackathon | *Semifinalist*

2025

- Developed an AI-powered Resume Analyzer and Chatbot capable of parsing resumes, extracting skills, and providing intelligent feedback using Natural Language Processing (NLP).

CERTIFICATIONS

- Infosys Springboard – Machine Learning Internship
- Ericsson Edge Academia Program
- AWS Cloud Fundamentals
- Microsoft Azure Fundamentals

CODING PROFILES

LeetCode: Solved 300+ coding problems covering Data Structures and Algorithms.

HackerRank: 5-star rating in Python and SQL.

GitHub: Published Machine Learning, Data Analytics, and Python projects with complete source code and documentation.

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Leadership
- Analytical Thinking
- Time Management
